- Registration: https://ufl.zoom.us/webinar/register/WN_wPyhNYb6RPaSM2MVkIGTUA

BMP success stories from the past

These BMP success stories are taken from Dr. Brian Bowman’s presentation *Best Management Practices*:

- Tree see system put on a Temik machine last year
- Cost to add the eyes was \$2,500, with \$1,500 supplied by the FDACS cost share program.
- **The grower reduced Temik application to a 249 acre grove from 6119 lbs to 4612 lbs, a savings of 1,507 pounds!**
- Grower hopes to upgrade 3 more Temik machines this year with the cost share program.

“Success Stories”

Citrus Grove

- 1000 acres
- 11,000 resets in the last 2 years
- \$7,000 (60% cost share) for sensors on a speed sprayer
- Reduction of 25% in pesticides applied to the grove during each application.

Fertilizer reductions for a citrus grower who received \$10,200 in cost share funds for a VRT spreader. Results only for 1st of 3 apps . . . Therefore, the 66 tons of fertilizer saved in this one application would result in **a reduction of nearly 200 tons applied over the course of a year.**

Grove	Resets	Size	Trad.	VRT	Savings	
	(%)	(ac)	(tons)	(tons)	(tons)	(%)
1	70	188	56	29	27	51
2	85	129	39	18	21	46
3	25	160	48	30	18	63
Avg/Tot	60	477	143	77	66	54
